

St. Francis Indoor Visitation Guidelines for Vaccinated Residents

1. Visits will take place Monday thru Friday between the hours of 8:00am and 5:45pm with the last visit beginning at 5:00pm and will last 45 minutes per visit. Visits will also take place on weekends between the hours of 11:00am and 5:45pm with the last visit starting at 5:00pm and will also last 45 minutes. Visits will now be able to take place in the residents' room if the resident is vaccinated. All visitors will be escorted directly to the residents' room by a staff member. Visitors will also be escorted from the residents' room to the exit after the visit. Visitors can make an appointment by calling the front desk 7 days a week between the hours of 10:00am and 6:00pm.
2. Indoor visits will be cancelled if there is a positive case of COVID-19. Visits would resume once CMS requirements are met for visits to resume.
3. Visitors must wear a surgical or procedural face covering that will be provided by St. Francis.
4. Visitors will now be able to touch and embrace the resident they are visiting if that resident is vaccinated and the resident is wearing a surgical or procedural face covering and the resident sanitizes their hands before and after the visit.
5. The facility will provide a hand sanitizing station in which each visitor must use the alcohol based hand rub before and after each visit.
6. All visitors will be required to be screened and get their temperature taken by a staff member. This will be located next to the reception desk.
7. All residents will be required to wear a surgical or procedural face covering that will be provided by St. Francis.
8. Visitors for each resident will be limited to 2 visitors. Due to every visitor having to wear a face covering, we are not permitting visitors under the age of 5. If a visitor wants an exception to the age limit rule, they can contact the Director of Nursing or Executive Director for approval.
9. We will be allowing 2 residents to have visits at one time.
10. Visitors will not be permitted to use the restroom at St. Francis.
11. We ask that all visitors report any signs and symptoms of respiratory illness or a fever to the facility that occurs within 14 days following the visit.

***If the above guidelines are not followed the facility has the right to ask the visitor to leave.**
